
The Pre-Audit Form

Every section of this form has a specific job. Understanding the "why" changes how you interpret the data during your deep dive.

SECTION 1 & 2: THE BASICS + CONTEXT

STRATEGIC PURPOSE

Gets the context you need to research their industry and understand their model before the call. It tells you which universe you're operating in so your AI recommendations are relevant to their actual world.

1. Your Name

2. Your Email

3. Business Name

4. Industry

E.g., Real Estate, Marketing Agency, E-commerce, Accounting, Construction

5. Roughly how many people work in your business?

☐ Just me ☐ 2-5 ☐ 6-15 ☐ 16-50 ☐ 50+

SECTION 2: WHAT YOU DO

6. In one sentence, what does your business sell?

E.g., "We help small businesses with their bookkeeping" or "We sell custom furniture online"

7. Who is your typical customer?

E.g., "Small business owners with 5-20 employees" or "Homeowners aged 35-55 doing renovations"

8. How do most of your customers find you? (Check all that apply)

☐ Referrals ☐ SEO ☐ Social Media ☐ Paid Ads ☐ Cold Outreach ☐ Events

SECTION 3: THE FOUNDER'S TIME

STRATEGIC PURPOSE

This is often where the biggest quick wins hide. Founders are usually doing stuff they shouldn't be doing. The "magic wand" question bypasses their logical brain and gets the real answer.

9. As the owner, what top 3 tasks eat up most of YOUR time each week?

Think about the stuff that pulls you away from high-value work.

10. If you had a magic wand and could instantly get 10 hours back, what task would you eliminate first?

Don't worry about whether it's realistic. What one thing would change everything?

SECTIONS 4-7: THE DEPARTMENT SWEEP

STRATEGIC PURPOSE

By going through each major area—marketing, sales, delivery, support—you're guaranteed to surface pain points they might not have thought to mention spontaneously. Even if some sections don't apply, the ones that do will give you gold.

11. Marketing: What's the biggest challenge you're facing right now?

E.g., Content creation takes forever, no consistent leads, social media is a time sink.

12. Sales: Do you have a sales team or is it just you handling sales?

☐ Just me ☐ Me + 1-2 others ☐ Dedicated sales team (3+) ☐ We don't do "sales"

13. Sales: When it comes to closing deals, what's the biggest issue?

E.g., Low conversion, slow follow-up, proposals take too long, Reps not using CRM.

14. Ops: What's the most time-consuming part of delivering your product?

Think about the steps between "customer says yes" and "customer is happy."

15. Ops: What recurring problem have you tried to fix but still remains?

That recurring problem that keeps coming back no matter what you throw at it.

16. Support: What causes the most headaches in client management?

E.g., Repetitive questions, messy onboarding, ball dropped on follow-ups.

SECTION 8: AI EXPERIENCE & EXPECTATIONS

STRATEGIC PURPOSE

The AI experience question tells you their sophistication level (how to pitch). The "success" question tells you how to frame your recommendations later: lead with time savings OR ROI based on their answer.

17. Have you or your team tried using any AI tools yet?

☐ No ☐ Yes, but not consistently ☐ Yes, regularly ☐ We're pretty AI-savvy

18. If yes, which tools have you tried and what was your experience?

19. If we find some big wins, what would success look like for you?

E.g., Save 10 hours, stop losing leads, get weekends back, scale without hiring.

20. Anything specific you're hoping I look at during the audit?

Any particular process, tool, or frustration you want me to dig into?
