

# Restoration Homes Seller Reply Engine

A low-risk 60-day pilot to turn seller data into tracked conversations, hot seller call lists, and closed deals — prepared for Restoration Homes by Ryan.

# You Already Have the Best Asset

Restoration Homes has a clear, compelling local offer that sellers actually want. The opportunity is to make sure more of them hear about it — and that no interested reply slips through the cracks.

## Cash Offer in 24 Hours

Fast, no-obligation response to every seller inquiry

## Sell As-Is

No repairs, cleanup, showings, or commissions required

## Flexible Closing

Close quickly or on the seller's own timeline

## Local Midlands SC Buyer

Trusted local presence in the community since 2009

# The Core Strategy: One Clean Loop

We don't need to build a giant real estate tech platform. We need one simple, repeatable operating loop that starts seller conversations and keeps improving with every batch.

Each step feeds the next. The system gets smarter with every campaign cycle.

# Why AgentMail Matters

## Not the blaster — the reply desk

AgentMail's job is not to send cold emails. Its job is to handle what happens *after* a seller replies — with speed, consistency, and human oversight at every step.

The goal is **speed-to-lead without losing control**. Every reply gets reviewed, classified, and acted on — nothing falls through the cracks.

### Classify the Reply

Instantly categorize every incoming seller message

### Summarize Context

Pull seller and property details into one view

### Draft a Response

AI drafts a reply — humans approve before sending

### Create Callback Tasks

Hot sellers get a same-day call task automatically

### Daily Hot Seller Brief

One clean summary of who to call today

# The Stack — One Job Per Tool

No tool soup. Every piece of the system has a single, clear responsibility.

## CRS / Tracerfy

Seller data sourcing

## Hermes

Scoring, segmentation, copy, weekly learning

## Smartlead

Email drip sending, deliverability, unsubscribes

## AgentMail

Seller reply desk and lead triage

## Tracker / CRM

Source of truth for all activity

## Restoration Homes

Seller calls, offers, and closings

# Lead Segments to Test

## Start with 500–1,000 sellers in the Midlands

Each segment gets slightly different messaging tailored to their likely situation. Testing multiple segments helps identify which audiences respond best.

- **Absentee Owners**  
Not living in the property — often open to a clean exit
- **Long-Tenure / Equity Homeowners**  
Likely built-up equity, may be ready to simplify
- **Out-of-State Owners**  
Distance makes managing property harder
- **Rental / Landlord Owners**  
Tired landlords are a classic motivated seller segment
- **Expired or Old Listings**  
Already tried to sell — may be ready for a simpler path

# The Messaging Angle

The campaign should not sound desperate, creepy, or overly personal. Keep it simple, local, and low-pressure.

"If selling as-is would ever be easier than repairs, showings, or waiting on financing, Restoration Homes can give you a no-obligation cash offer."

## Local Midlands Buyer

Not a national hedge fund — a real local business near Chapin

## No Obligation

Sellers can hear a number with zero pressure to accept

## Sell As-Is

No repairs, no cleanup, no commissions

## Flexible Timeline

Close fast or on the seller's schedule — their choice

# Example First Email

## What a real outreach email looks like

Short, plain, and human. No hype, no pressure, no creepy personal details. Just a simple local offer with an easy yes or no.

 Subject lines should be conversational and honest — never deceptive. "quick question about your property" works well.

The email is designed to start a conversation, not close a deal. The deal happens on the phone with Restoration Homes.

 **Subject:** quick question about your property

Hi {{first\_name}},

I'm reaching out on behalf of Restoration Homes — a local Midlands SC home buyer based near Chapin.

Not sure if you've thought about selling, but if you ever wanted a simple as-is option for the property in {{city}}, Restoration Homes can usually give a no-obligation cash offer in 24 hours.

No repairs, showings, or commissions.

Would you be open to seeing what that number could look like?

{{sender\_name}}

Restoration Homes

(803) 590-8818

# AgentMail Reply Classifications

Every seller reply gets a classification the moment it arrives. This keeps the team focused on the right conversations — and makes sure hot sellers never wait.

## **HOT\_SELLER**

Same-day call task created immediately

## **WANTS\_CASH\_OFFER**

High intent — prioritize callback

## **HAS\_QUESTIONS**

Needs more info before deciding

## **NEEDS\_CALLBACK**

Prefers a phone conversation

## **NURTURE**

Not ready now — keep warm

## **NOT\_INTERESTED**

Suppress from future sends

## **WRONG\_PERSON**

Remove from list

## **LEGAL\_OR\_ANGRY**

Escalate to human review immediately

✔ Unsubscribes are suppressed immediately — no manual step required.

# Example Reply Handling in Action

## Seller Reply

"How much would you offer?"

Three words. Maximum intent. This is exactly the reply the system is built to catch and act on within minutes — not hours.

 Restoration Homes handles the actual offer conversation. AgentMail just makes sure it never gets missed.

## AgentMail Output

### Classification

HOT\_SELLER

### Urgency

High — call immediately

### Draft Reply

"Happy to take a quick look. What's the best number to reach you, and is the property still in {{city}}?"

### CRM Status

NEEDS\_CALLBACK — task created

# 60-Day Pilot Plan

A simple, structured rollout designed to prove the concept without overcomplicating the launch.

## Week 1 — Setup

Pull 500–1,000 seller records. Clean, segment, and verify emails. Build Smartlead campaign. Set up AgentMail reply desk. Build tracker.

1

2

## Weeks 2–3 — Launch

Send first batches. Review replies daily. Call hot sellers fast. Identify early patterns in response quality.

## Weeks 4–8 — Optimize

Improve segments and messaging based on results. Track seller conversations, appointments, offers, and deals through to close.

3

✅ The system is designed to get smarter every week. Early results inform every subsequent batch.

# Success Metrics — The Full Funnel

The goal is not just "emails sent." The goal is seller conversations that can turn into deals. Every stage of the funnel gets tracked.

## What we track at every stage

- Leads pulled and emails verified
- Emails sent and bounce rate
- Total replies and positive replies
- Hot seller replies and calls made
- Appointments booked and offers made
- Contracts signed and deals closed
- Revenue and profit from closed deals

☐ Tracking the full funnel shows exactly where to improve — not just whether the system is "working."

# Compliance Guardrails

This is a marketing system, not a legal-risk machine. Keeping it clean protects Restoration Homes and makes the whole system more sustainable long-term.

1

## CAN-SPAM Compliant

Clear sender identity, real business contact info, and a simple unsubscribe process on every email

2

## Honest Subject Lines

No deceptive or misleading subject lines — ever

3

## No Creepy Language

Avoid "we know your situation" phrasing or overly personal details that feel invasive

4

## Fair Housing Awareness

Avoid targeting criteria that could raise fair housing concerns or discriminatory patterns

5

## Calling / Texting Rules

Check applicable rules before calling or texting any leads from the list

6

## Humans Approve

AgentMail drafts responses — a human approves before anything goes out

# Why This Is Worth Testing

This is a low-risk pilot because the foundation is already in place. We're adding a system on top of something that already works — not building from scratch.

## **Strong Local Offer Already Exists**

Restoration Homes has a proven, compelling offer that sellers in the Midlands already respond to

## **Seller Data Is Accessible**

Lists can be pulled from existing sources — no expensive new data contracts needed to start

## **Hot Sellers Get Called Faster**

The reply desk means no interested seller waits hours for a response while the opportunity cools

## **Results Are Fully Measurable**

Every stage of the funnel is tracked — so we know exactly what's working and what to improve

## **Repeatable Beyond This Pilot**

If it works here, this becomes a repeatable service for other real estate investors and cash home buyers

# Proposed Next Step

Start with a simple 60-day pilot. Ryan sets up the system and runs the test as a buddy proof project — no cost to Restoration Homes to get started.

## What Restoration Homes Provides

- ☐ **Seller data export**
- ☐ **Approved sender identity and contact info**
- ☐ **Opt-out language and business address**
- ☐ **Call process for hot sellers**
- ☐ **Feedback on lead quality and outcomes**

## The Goal

Prove whether the system can create real seller conversations and closed deals in the Midlands market over 60 days.

- ✔ If the pilot works, we have a proven, repeatable playbook. If it needs adjusting, we'll know exactly where and why.

Simple. Low-risk. Measurable. Let's find out what's possible.
